RE: Claim #: C78107  
Date of Loss: June 14, 2006  
Location: Central Library

Dear Mr. Tajalle:

I have completed the investigation into the claim for damages you filed against the City of Seattle.

The Seattle Public Library reports the injury you are claiming happened when you were asked to leave the library, were following a security officer out of the building and attempted to step into the same one-person leaf of the revolving door that the officer was in. Your backpack was then caught between the door and the frame.

At the time of your incident the doors were functioning properly and were free of defects. The revolving door in question has a built-in break-away safety feature designed to prevent patrons from becoming trapped in the doors. That feature was functioning properly at the time of your incident. The ground was clean and not wet or slippery in any way.

Your injuries are unfortunate. However, the City cannot pay a claim unless there is negligence on the part of the City. In this case, security personnel acted appropriately and the door was free of defects and performed as designed. In the absence of negligence on the City of Seattle, we must respectfully decline payment of your claim.

Sincerely,

Tanya Crites
